EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James A. Wilke, Reg. No. 34,279 on 6/30/06.

2. In claim 13 change "the deflection" to --deflection--.

Response to Arguments

3. Examiner withdraws his objection to the claims based upon the amended claims filed.

Allowable Subject Matter

4. Claims 1-26 and 28-31 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claims 1, 26 and all claims dependent thereof are allowable over the prior art of record because the prior art does not teach or suggest a basepan assembly for a panel board and method for mounting a bus bar in a basepan comprising "a basepan", "a first bus bar", "a second bus bar mounted on a side portion of the second bus bar proximate the side wall and aligned 90° from the first bus bar, wherein, with the basepan coupled to the panel board, the panel board prevents deflection of the sidewall of the basepan." Claims 13 and all claims dependent thereof are allowable over the prior art of record because the prior art does not teach or suggest a load center comprising "an enclosure", "a

basepan", "a first bus bar", "a second bus bar mounted on a side portion of the second bus bar proximate the side wall and aligned 90° from the first bus bar, wherein, with the enclosure prevents the deflection of the sidewall of the basepan mounted in the enclosure." The aforementioned limitations in combination with all remaining limitations of the respective claims are believed to render said claims 1, 13, 26 and all claims dependent thereof patentable over art of record.

5. The closest prior art of record is Buchanan (US 6,459,570) which teaches a basepan, a first bus bar, a second bus bar mounted on a side portion of the second bus bar proximate the side wall and aligned 90° from the first bus bar, but fails to teach that the with the basepan coupled to the panel board or enclosure prevents deflection of the sidewall of the basepan.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Hoffberg whose telephone number is (571) 272-2761. The examiner can normally be reached on 8:30 AM - 4:30 PM Mon - Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynn D. Feild can be reached on (571) 272-2092. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
